

Craving Master

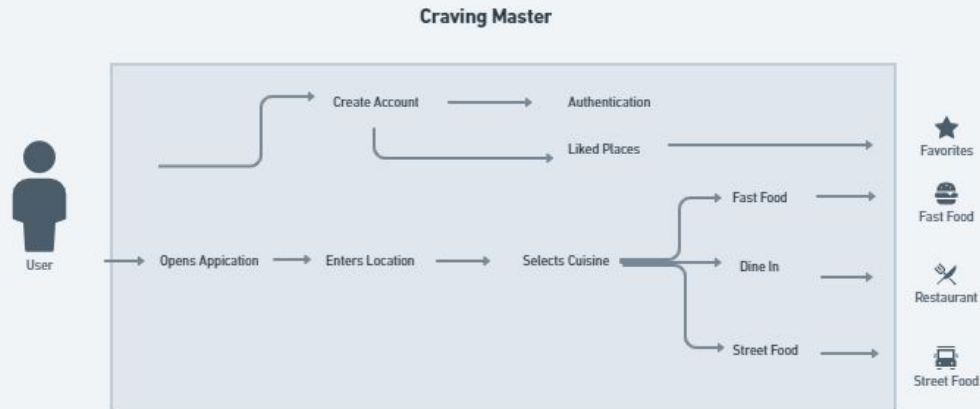

By Jakob Potosme & Vincent Zhang

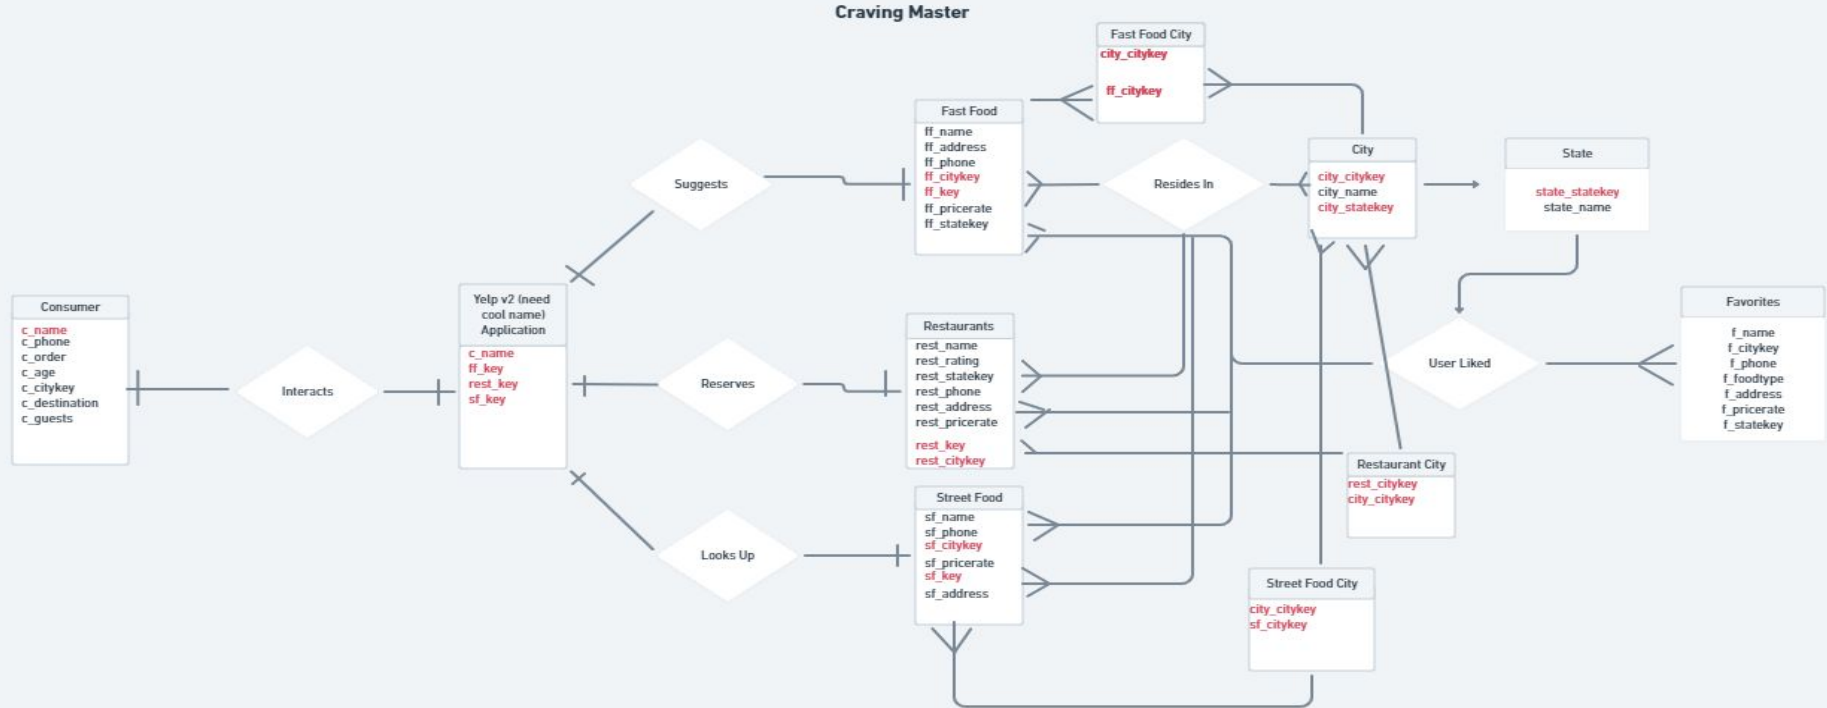

SYSTEM DESCRIPTION

- Our project is a tool to help conquer your cravings
- User enters their location and cuisine choice then several options will appear
- User will be able to decide from fast food, street food and dine in options
- User can narrow down selection based on location and budget
- User can also leave reviews for the places they visit

USE-CASE DIAGRAM

E&R DIAGRAM

IMPLEMENTATION DETAILS

- Log-in authentication
- Utilizes your location or location of choice to search for various types of food in the general range
- Using a database that contains restaurants, fast food locations, and street food vendors
 - Queries the database with your preferences and selects locations best fit
- The user may also save vendor locations that are their 'favorites' under favorites
